DIV. OF OIL, GAS & MINING

Dear Paul,

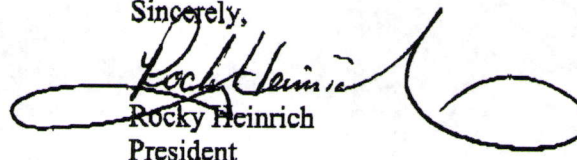

As you know, we filed for a Name Transfer of our mine and I was wondering if you could help explain the following to me.

Susan White from your office sent me a letter of corrections she wanted make on the Mine Transfer Notice that I submitted a few weeks ago. In researching her findings, I have become confused with the different file numbers and sections in our records. So would you please look into this and call me to discuss the following.

1. Back on April 15, 2002, you sent a letter to me for the approval to commence mining. This was shown as file # S/015/090. Some other paper work that we have filed and received from your office thru the years also showed the file number as S/150/090, so please confirm which is correct.
2. Also on the April 15, 2002 letter, you list the legal description for the mining to commence on Sections 2 and 3, Township 23 South, Range 6 East, and Section 34, Township 22 South, Range 6 East, SLBM, which is the description we use to file the annual mining reports. This is the same description that Susan said was our access roads in her 12-7-05 letter. However, the actual lease agreement shows the description, for our 40-acres of land, as Section 2: SE1/4SW1/4, Township 23 South, Range 6 East, SBLM. Which description is correct and why is there a difference? The access roads are also known as the Cowboy Mine Road "County Road #915" and Jensen Spur Road "County Road #916".
3. I also found and question a BLM Right-of-Way that was granted to Rockland in April 02. The description is: Salt Lake Meridian T 23 S., R 6 E., Sec 3, E1/2SE1/4NE1/4, NE1/4NE1/4SE1/4. What's this for and do we need to list it? I don't even know if we use this right-of-way based on what Susan's 12-7-05 letter stated about the access roads. Is the right-of-way different than the access roads?

I appreciate your help with this. Please call me as soon as possible to discuss.

Sincerely,

Rocky Heinrich
President
